

RJR COMPANY PROFILE

February 2025— Version 8

QUALITY IS NOT AN ACT, IT IS A HABIT

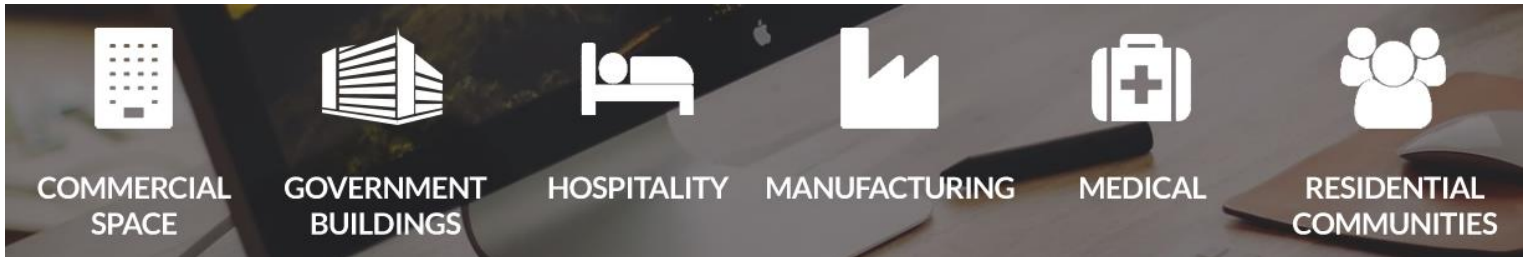

Formerly “Rihany Contracting” company since 1995, RJR Trading and Contracting, was established in LEBANON in February 2014 to provide consultancy, engineering and contracting for Renewable Energy, Electrical, Mechanical, Civil and Instrumentation works.

RJR Trading & Contracting is capable, anytime, of calling upon the best of materials as well as engineering and technical expertise to meet the most stringent international standards required for executing the work assigned. We undertake and execute all major trades such as solar, wind, electrical power, security systems, heating, cooling, plumbing, painting, renovation, operation and maintenance works through our experienced staffs' innovations and passions.

*Eng. Rony Rihany
General Manager*

RJR provided consultancy services for one of the most important projects in Lebanon over the last 3 years, for INARA project (Integration of an Autonomous Lighting System in the Rural Area of Halba Akkar).

Project finance budget was 600,000 Euros ; and the project was well executed and commissioned in February 2019; and delivered to the municipality of Halba.

The main parties and organizations that took part of the project were :

OUR PARTNERS

RJR is working since 2019 on trainings with the French organization IECD; to provide our experience to young students and teach them about the sustainable energy development. Each session is composed of 16 trainees to develop their theoretic and technical capacities related to sustainable energy over 60 intensive hours.

USAID
FROM THE AMERICAN PEOPLE

PILOT PROJECT

After Beirut explosion in August 2020, RJR was awarded from USAID / CHEMONICS in May 2021 to implement one of the pilot projects in Lebanon; to modify the damages for the electrical panels boards and underground cables; as well to install 500 Led lighting lamps all over the city which provide lighting for the highway and internal streets and improve the security and night life of the capital.

OUR CLIENTS

RJR worked many projects with UNDP since 2014 in Lebanon, Syria and Iraq; some of these projects were consultancy and the other ones were contracting.

We provided consultancy services in the energy field for the following projects:

- Improving the roads lighting and provide solutions to power them with the lower cost possible. Project in Tripoli Lebanon, cost around 150,000 USD.
- Finding solutions for the existing damaged solar street lighting systems and try to fix them. Project at Tartous and Homs, cost around 50,000 USD.

We provided also contracting services for 6 facilities, some of them :

- Solar power plant 150 kWp for ELCIR Factory in 2022. Project cost around 146,000 USD
- Solar power plant 100 kwp for the South Suburbs Federation building in 2018. Project cost 100,000 USD
- Solar power plant 40 kWp for the Armenian Elderly buildings in 2018. Project cost 45,000 USD

MUNICIPALITIES

- Qalamoun - Tripoli
- Nahriya - Akkar
- Aaychiye – Jezzine
- Machta - Akkar
- Majed Al Maouch - Chouf
- Temnin Fawka - Bekaa
- Rmeich – Bint Jbeil
- Bejdarfel – Batroun
- Sin El Fil - Metn
- Mlikh – Jezzine
- Enfe - Batroun

RJR offers a special sustainable energy program for the municipalities, especially villages with limited income resources, by finding solutions and ways to reduce energy consumption and make it as a green village.
